Biographies

Judith Glover, Professor of Employment Studies, Roehampton University Business School. Judith’s research interests include women’s employment, in particular women in scientific employment, and she has published widely in this area. Judith is on the European Commission list of experts for specific science and technology policy issues. Her work has been funded by the ESRC and the European Commission Research Directorate General. Judith is on the editorial committee of the journal Equal Opportunities International and the International Journal of Gender, Science and Technology. Judith was the Project Director for the European Social Fund and Department for Trade and Industry project that investigated ‘best practices’ in the recruitment of women in ITEC. She is also the Director of the Centre for Organizational Research at Roehampton. This is a multi-disciplinary community working to develop a complementary understanding of complex issues in organizations.

Dr Christina Evans, Roehampton University Business School. Christina’s research interests include women’s employment in technology employment, as well as career and talent management. In her previous career she worked on several applied research projects that investigated different organizational approaches to supporting employees with their careers, including those wishing to pursue a technical career. Christina currently has a combined teaching and research role within the Business School, where she teaches Human Resource Management, Organizational Behaviour and Diversity Management. With colleagues in the Business School, Christina worked on the Department for Trade and Industry funded ‘best practice’ recruitment project and the Royal Academy of Engineering ‘Implementing Diversity Policies: Guiding Principles’ project. Both of these projects resulted in publications available for wider dissemination.
