Biography

Professor J. McGrath Cohoon works toward understanding and improving the gender composition of computing through her positions as Senior Research Scientist at NCWIT (the National Center for Women & Information Technology) and Associate Professor of Science, Technology, and Society at the University of Virginia. With funding from the National Science Foundation, she conducts research and interventions, trains practitioners, and assesses program outcomes. The results of her research are reported in scholarly journals and an award-winning book, co-edited with William Aspray, from MIT Press – Women and Information Technology, Research on Underrepresentation.
