

The IAU SDG3 Cluster on Health and Wellbeing

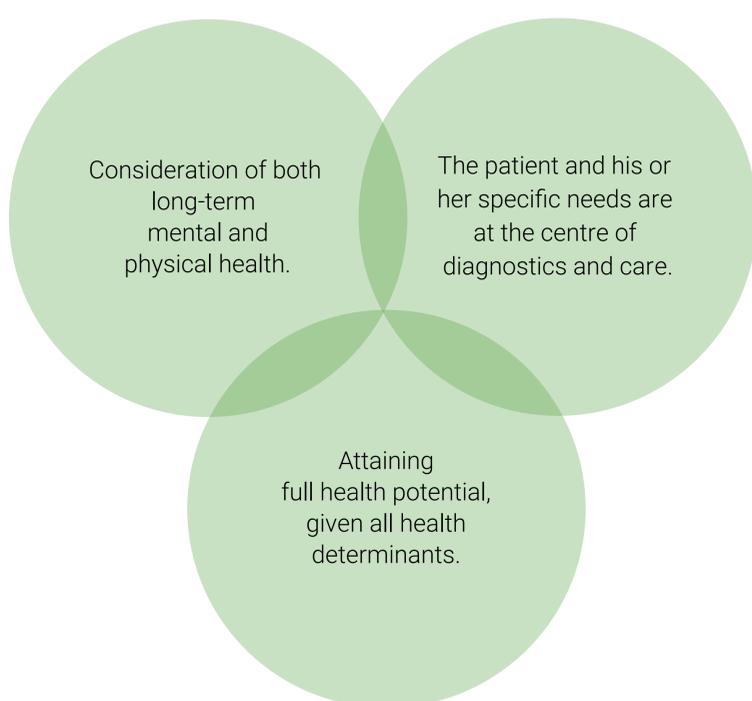

“Health as a universal human right, equity and inclusivity”

Vision

Higher Education Champion for an integrated approach to health, in support of equity and wellbeing worldwide.

Priority Areas

- | | | | | |
|---|--|---|--|---|
| 1 | 2 | 3 | 4 | 5 |
| Helping to bridge the science/knowledge/policy gap. | Encouraging the consideration of local needs and voices. | Focusing on equity and integrated, patient-centred approaches to health in curricula. | Harnessing the power of online working and e-health methodologies and tools. | Fostering collaboration and a systems approach. |

Activity Areas

Information sharing and learning

Joint communication and advocacy

Institutional exchanges

Cross sector and cluster engagement

Members

Universitat Oberta de Catalunya (Spain)
Cluster Lead

Universidad de Caldas (Colombia)

University College Dublin (Ireland)

Universitas Gadjah Mada (Indonesia)

Makerere University (Uganda)

Universidad Autonoma Metropolitana (Mexico)

Western Sydney University (Australia)

Principles of Engagement

Committed, collaborative and inclusive

Sharing ideas and expertise, respecting and integrating different world views.

Open and Fluid

An open knowledge network ignited by a common vision and values.

Glocal

Working towards locally relevant and appropriate solutions, while sharing knowledge globally.

Systemic

With a holistic, patient centred and interdisciplinary lens to approaching health.

What makes the cluster unique?

Socially minded professionals and institutions with a strong interest in promoting **equity in health**.

Glocal: Members from five continents locally embedded in their communities and nationally, regionally and globally connected through networks and academic activities.

Interdisciplinary and action focused.

A unique combination of **global health** and **higher education** experts driving the **SDG3** and wider **SDG agenda** in their institutions and wider sphere of influence.

Information and communication technologies and expertise are leveraged to increase equity and access to health.

A focus on making **research and knowledge actionable**.

A global initiative led by the **International Association of Universities**, an international network **created under the auspices of UNESCO** and comprising almost

600 members from over **120** countries
